UI Design Using RAD Model for Editorial Sanctuary: An Aesthetic Online Bookstore Mobile Application

---

AIM:

To simulate the lifecycle stages of UI design using the RAD (Rapid Application Development) model and develop an interactive and aesthetic **online bookstore mobile application prototype** named **Editorial Sanctuary**.

INTRODUCTION:

RAD (Rapid Application Development) is a software development methodology that emphasizes rapid prototyping, iterative development, and continuous user feedback.

In this experiment, an aesthetic online bookstore application named **Editorial Sanctuary** is designed. The application provides users with a calm and premium reading experience where they can explore books, view recommendations, purchase books, and manage their reading list. The UI focuses on minimalism, elegance, and a cozy reading atmosphere.

PHASE 1: REQUIREMENTS PLANNING

1. Identify Key Features

Navigation:

- Onboarding Screen
- Login / Signup Screen
- Home Screen (Book Discovery)
- Book Details Screen
- Reading List / Cart Screen
- Profile Screen

User Actions:

- Create account / Login
- Browse book categories
- Search for books and authors
- View book details
- Add books to cart or reading list
- Purchase books
- View reading progress and order history

---

2. Functional Requirements

1. User can register and log in
2. User can browse books by category
3. User can search for books and authors
4. System displays featured and recommended books
5. User can view detailed information of books
6. User can add books to cart or wishlist
7. User can purchase books
8. User can manage profile and reading history

PHASE 2: USER DESIGN

Tool Used:

Figma

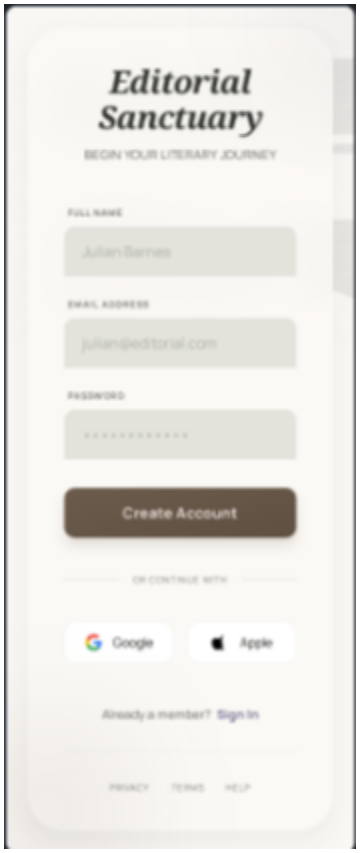
Wireframes / Screens Designed:

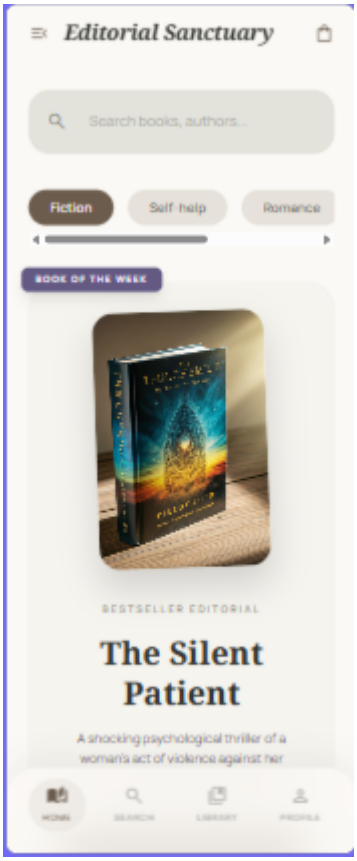
- Onboarding Screen with illustration
- Login / Signup Screen
- Home Screen with featured books
- Book Details Screen
- Reading List / Cart Screen
- Profile Screen

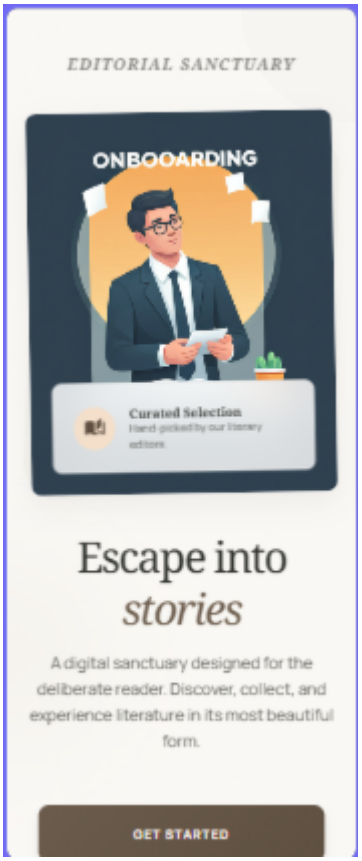
Interactions Implemented:

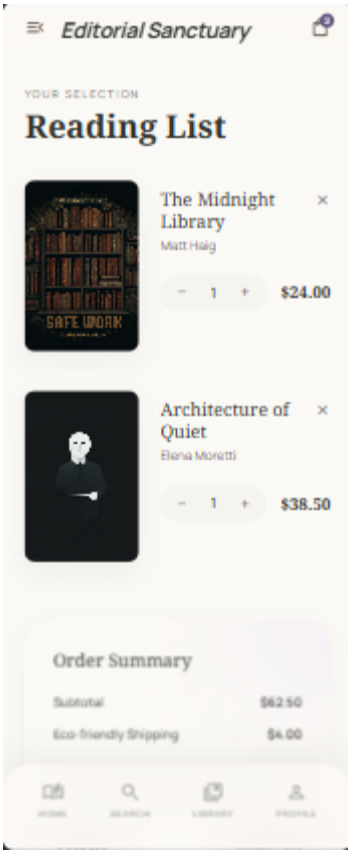
- Button click navigation between screens
- Smooth transitions between pages
- Interactive book cards
- Add to cart / wishlist interaction
- Rating and review display
- Scrollable content sections

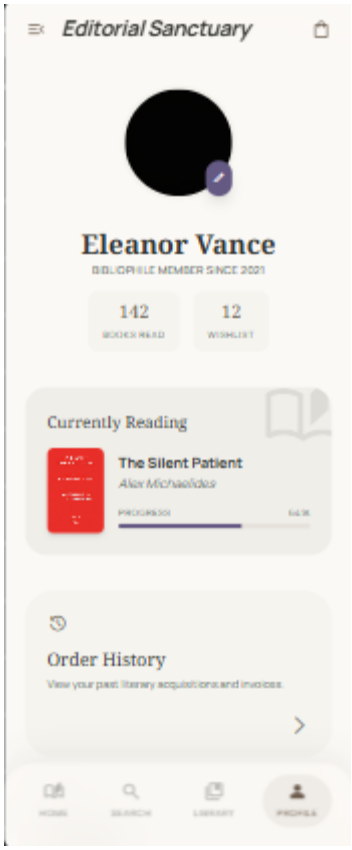
SCREENSHOTS











PHASE 3: CONSTRUCTION

1. Interactive Prototype

- All screens connected using Figma prototype
- Navigation flow implemented:

Onboarding → Login → Home → Book Details → Cart → Profile

---

2. Dynamic Features

- Smooth UI animations and transitions

- Book card hover/tap effects
- Interactive rating system
- Add to cart animation
- Clean and aesthetic typography
- Soft color palette for better user experience

---

3. Testing

- Prototype tested using Figma preview
- Verified navigation between screens
- Ensured readability and UI consistency
- Improved spacing, alignment, and usability

PHASE 4: CUTOVER

1. Finalization

- Completed aesthetic UI prototype
- Ready for development and deployment

---

2. Documentation

- UI screens documented clearly
- Navigation flow explained
- User interactions defined

RESULT:

Thus, the online bookstore mobile application **Editorial Sanctuary** was successfully designed using Figma following the RAD model. The prototype demonstrates an elegant, user-friendly, and visually appealing book browsing and purchasing system.
